

Defence Fact Sheet

Our history of working with defence organisations and suppliers to provide a complete range of state-of-the-art hardware, software and the specialist knowledge required. Our services to the defence industry include 3D scanning, dimensional inspection and reverse engineering. We are capable of measuring precision engineering components to the order of microns all the way to long range 3D scanning of the largest naval vessel to the highest level of detail.

Specific applications of our defence services include:

- Precision 3D data capture and CAD modelling of entire vehicle and weapon platforms
- Dimensional Design compliance and verification
- Reverse engineering of legacy components
- 3D visualisation and simulation
- Blast Deformation analysis
- Asset capture and recording
